

DIVISION 28 – ELECTRONIC SAFETY AND SECURITY

ELECTRONIC ACCESS CONTROL	28 10 00
----------------------------------	-----------------

The Campus is currently investigating access control, video monitoring, and security alarm systems. If such systems are not included in the project scope for new construction or major renovation, consult the University's Representative for infrastructure requirements for future installation.

Standard low-voltage cable colors:

1. CCTV: green
2. Access, security, & environmental alarms: grey and white.

FIRE DETECTION AND ALARM	28 31 00
---------------------------------	-----------------

Refer to the University's Standard Specification Section 28 30 11 Fire Detection Alarm and Section 28 08 00 Commissioning Electronic Safety Security. The specification shall be modified by the Design Professional to meet project requirements. Electronic copies (Word documents) are available, contact the University's Representative.

Standard low-voltage cable colors: red and white.
